## **ANNOUNCEMENTS**

### **IJCAI-79, SIXTH INTERNATIONAL JOINT CONFERENCE ON ARTIFICIAL INTELLIGENCE**

**August 20–24, 1979, Tokyo, Japan**

**Deadline for submission of papers to Program Committee: February 1, 1979.**

#### **Contact**

Dr. Pat Hayes, Program Committee Co-Chairman (Europe),  
Department of Computer Science,  
University of Essex,  
Colchester CO4 3SQ,  
Essex, U.K.  
(0206) 44144, ext. 2371 or 2325.

Professor Raj Reddy, General Chairman,  
Department of Computer Science,  
Carnegie-Mellon University,  
Pittsburgh, PA 15213, U.S.A.

#### **Sponsor**

International Joint Conference on Artificial Intelligence.

### **ASLIB-TECHNICAL TRANSLATION AND INFORMATICS GROUPS SEMINAR ON TRANSLATING AND THE COMPUTER**

**Tuesday, November 14, 1978, Lecture Theatre, Sudbury House, 15 Newgate Street,  
London EC1, U.K.**

Machine translation has reemerged after a long period in limbo and there is growing evidence of its value. Computer systems can assist with the everyday problems of translation in an increasing variety of ways including machine dictionaries. The primary purpose of the one day seminar is to introduce translators to this new dimension in their activities and to ensure that the designers of computer systems are aware of practical needs. The seminar will also be of particular interest to

the designers of retrieval systems, especially those concerned with linguistic aspects. This mixed audience is an essential element in the intention of the seminar, the object of which is to bring together the language and computing disciplines and to demonstrate how their activities can interact and benefit each other.
